The Eclipse "Fever": being always open to new science

AAS Eclipse Workshop Sept 29-30, 2023 Costantino Sigismondi sigismondi@icra.it San Antonio, TX in memoriam of J. M. Pasachoff and S. Koutchmy

The *eclipse fever* is related to an intense preparation to observe this event.

Strong gratifications & delusions are possible also in sunsets, sunrises, planetary & meridian transits, equinoxes, solstices...always related to Celestial Mechanics and *Solar Astrometry, when a passage through a line is timed to get the solar diameter.*Why the *fever*? Here my answers

- 1. Good observations stands forever (H. Shapley)
- 2. Astronomical events are unique in spacetime
- A scientific campaign is a logistic/economic effort
- 4. Eclipses are opportunities for solar limb & corona physics
- 5. The Dark Sun and its environment are unforgettable
- 6. Eclipse and ... beauty chasers!

The geometrical order of Nature is beauty Codex Vindobonensis 2554, f.1 verso
