Solar Eclipse Timer

# Eclipse Day 2024 and More!

How To Enjoy,  
Observe, and  
Photograph  
A Total Solar Eclipse

By Gordon Telepun, MD

## Chapters

- |                              |                            |
|------------------------------|----------------------------|
| 1. Observing Site            | 15. Baily's Beads          |
| 2. First Contact             | 16. Second Contact         |
| 3. The Partial Phases        | 17. Totality               |
| 4. Temperature Changes       | 18. Planets and Stars      |
| 5. Pinhole Projection Images | 19. Max Eclipse Horizon    |
| 6. Sharp and Fuzzy Shadows   | 20. Third Contact          |
| 7. Mysterious Eclipse Breeze | 21. Baily's Beads          |
| 8. Convective Clouds         | 22. Diamond Ring           |
| 9. Animal Behavior           | 23. Replace Camera Filters |
| 10. Ambient Lighting Changes | 24. Shadow Bands           |
| 11. Shadow Bands             | 25. Umbra Exit             |
| 12. Umbra Approach           | 26. Final Partial Phases   |
| 13. Remove Solar Filters     | 27. Fourth Contact         |
| 14. Diamond Ring             | 28. The Eclipse Ends       |

# A "Totally" New Concept For An Eclipse Preparation Book

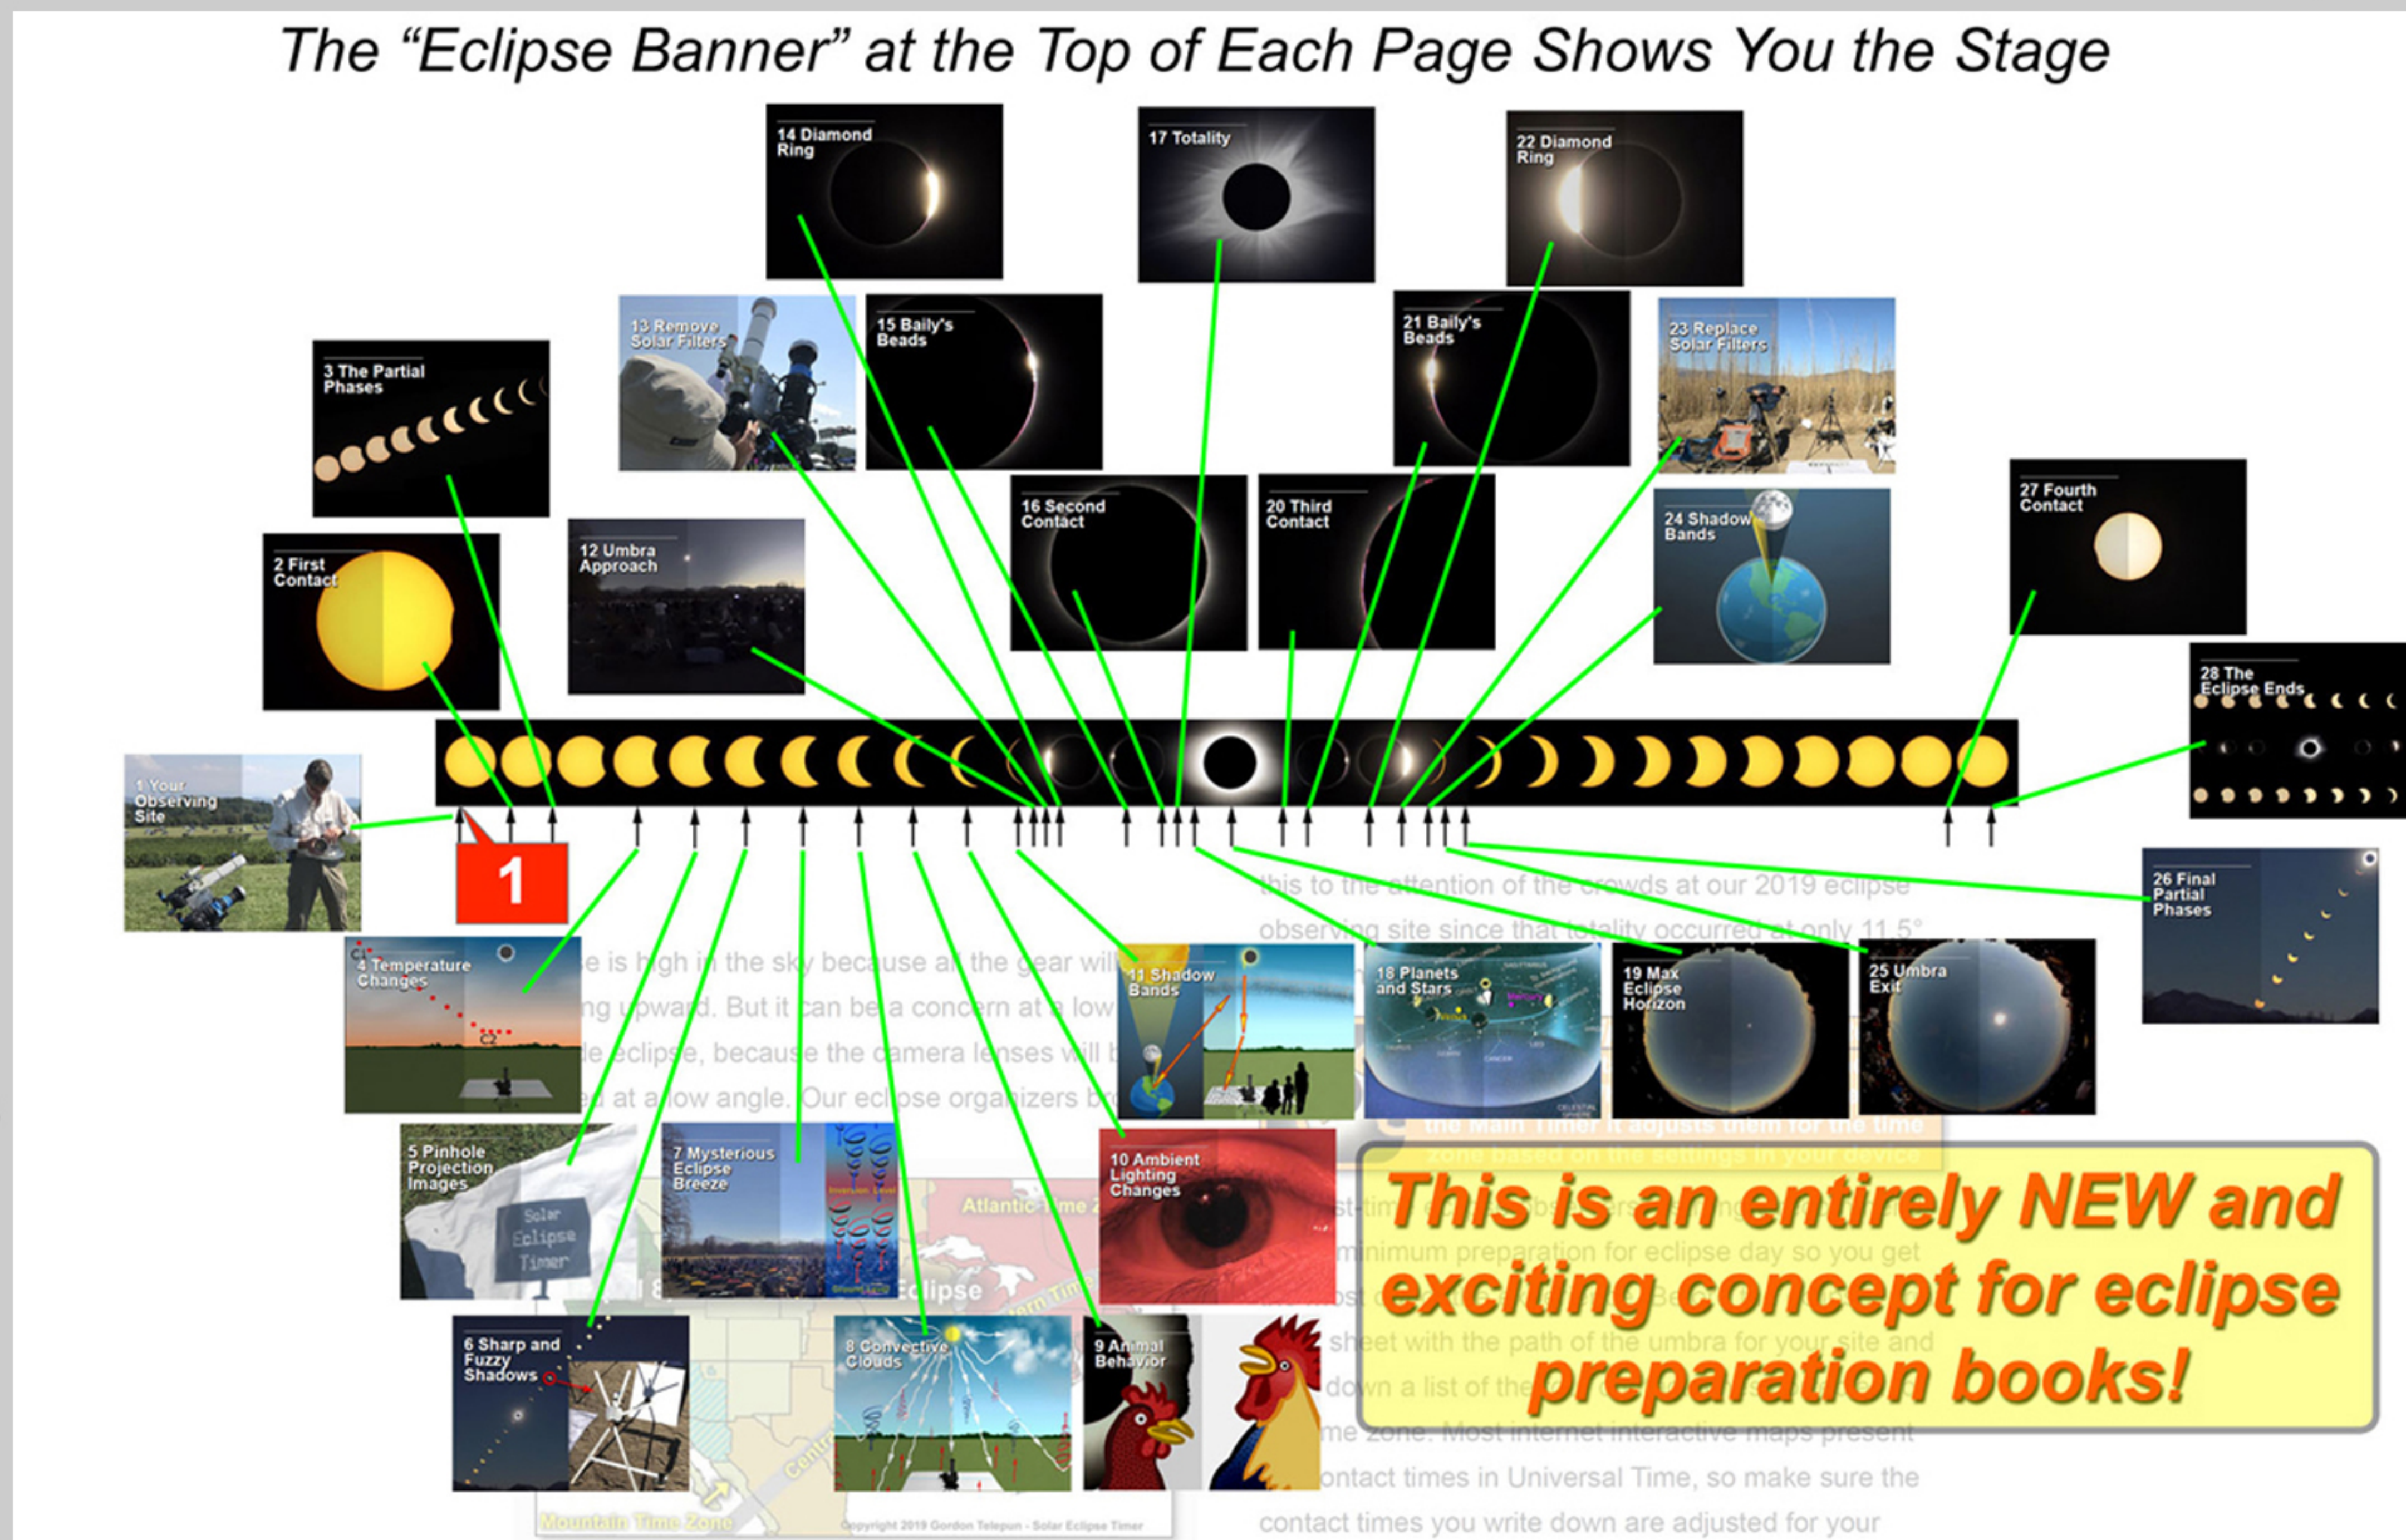

The readily available eclipse books are organized with chapters containing a single eclipse subject. And many chapters contain subjects not necessary for having a successful "eclipse day." The books require the reader to pick and choose information from multiple chapters to create a coherent plan for what happens on "eclipse day."

*My new e-book takes a fresh approach that makes preparing for a total eclipse more intuitive.*

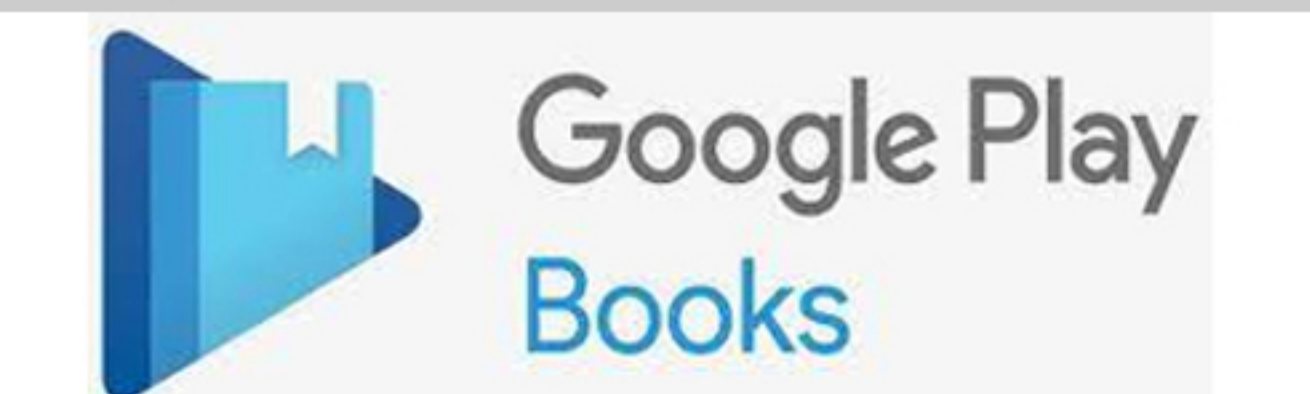

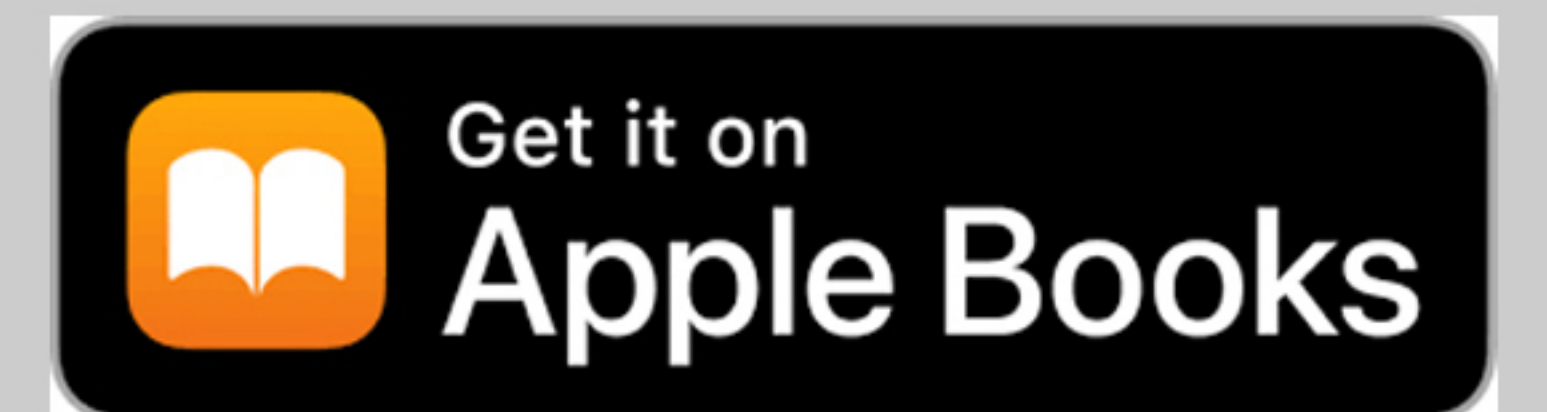

The focus of my book is "eclipse day!" I divide the day into 28 unique events, each of which is a chapter that follows the progression of the eclipse! The chapters describe setup tips, observation tips, astronomy, science, photography, videography, etc.

All information relevant to that eclipse event is available right in that chapter!

The "Eclipse Banner" at the Top of Each Page Shows You the Stage
